DiamondClock Lab | Conditional simulation
Single electronic transition (sim.)
Electronic transition average (sim.)
External temperature correction (sim.)
Nuclear transition average (sim.)
Electronic-nuclear composite (sim.)
Published upper limit: Lourette 2026
Overlapping Allan deviation $\sigma_y(\tau)$
10^{-6}
10^{-7}
10^{-8}
10^{0}
10^{1}
10^{2}
10^{3}
Averaging time τ (s)
SIMULATED DATA | No experimental fit | Drift retained | Maximum averaging time = record / 10
Shading: 5th-95th model ensemble quantiles; not measurement confidence intervals
N=32,768; dt=1 s; seed=20261019; bias=475 G; full assumptions in config.json
