Clock readout assumptions: paired Allan-deviation comparison
single_electron | Original assumed readout
single_electron | ODMR-informed ideal readout
electron_average | Original assumed readout
electron_average | ODMR-informed ideal readout
composite | Original assumed readout
composite | ODMR-informed ideal readout
Overlapping Allan deviation
10^{-6}
10^{-7}
10^{-8}
10^{0}
10^{1}
10^{2}
Averaging time (s)
SIMULATION | Ideal resolved-line photon readout; no lock or accuracy validation
